Product overview
Page 70

Just one word
describes the best picture.

KURO

When it comes to television black is the canvas. Black is the foundation. Black is the backdrop that makes everything else possible. The deepest black levels produce the purest colours and the sharpest details. Achieving the blackest blacks imaginable and building a screen that delivered the absolute best picture quality in the world was the inspiration and driving force behind our newest flat screen TV. We've called it KURO, which means black in Japanese. KURO gives you the ability to see literally every shade between black and white, the most vivid and flawless colours. Allowing you to see and hear like never before.

Just one way to describe the perfect match.

LX

The LX series components represent nothing less than our most ambitious ideas, our finest technologies and our most sophisticated design. All dedicated to the realisation of a single, glorious objective: flawless interaction with KURO, the stellar performer in the world of flat screen TVs.

Be it a Blu-ray disc player, DVD player, HDD/DVD recorder, multi-channel AV receiver, speakers or a home cinema system – every LX product is built to function – both aesthetically and technologically – perfectly with KURO; truly creating something even greater than the sum of its parts. It's the truest expression of what we mean when we say seeing and hearing like never before.

Because only the
finest spectacle captures
the eye.

KURO flat screen TVs

Fascination.
Just picture it.

Loud and clear.
Nowadays, the ability to receive digital-quality TV broadcasts is becoming an ever more widespread standard. And with a KURO flat screen TV, you're perfectly equipped. Every unit features not only an integrated analogue tuner, but also a DVB-T tuner to enable digital terrestrial TV reception. What's more, our top-of-the-range models are equipped with a DVB-S tuner capable of receiving satellite signals.
The Pioneer KURO flat screen TVs featuring both digital terrestrial and digital satellite TV broadcast reception are compliant with the EICTA "HD TV 1080p" Minimum Requirements and support MPEG-4 high definition decoding.* So now, whatever you watch, you take your TV viewing experience to the max.

Deepest black.
At the heart of the KURO flat screen TVs is our evolutionary **Ultra Black Panel** with its **Improved Crystal Emissive Layer**. As well as guaranteeing the most intense display of black tones, it offers dynamic colour reproduction. Even the darkest areas of the picture remain vibrant, authentic and precisely contoured. Smooth gradation steps are accompanied by colours that remain lush and crisply delineated even in dark scenes.

Perfect image detail.
The **Video Processing** system is designed to meet the superb capabilities of the new panel, enabling it to reproduce exceptionally clear and sharp, noise-free images every time. With its seamless integration of **Intelligent Picture Analysis** technologies, even the smallest details and finest nuances are highlighted in the best possible resolution.

Absolute colour accuracy.
The **Direct Colour Filter 3+** makes sure that even in brightly lit rooms or areas where light falls directly onto the screen, the picture and perceived black levels remain unaffected by ambient light reflections. Even the darkest image areas are always displayed in finely structured detail with no smearing or distortion. It also ensures extreme natural colour reproduction with significant overall depth.

Maximum contrast.
The high-performance panel makes it possible to display the deepest black tones. It also delivers a previously unheard-of contrast ratio. The panel's special **Deep Waffle Rib structure** ensures that each individual plasma cell is supremely encapsulated on all sides so that emitted light cannot leak into neighbouring cells and disperse their brightness. This creates an image that remains clear and rich in contrast at all times.

* see backcover

See everything.
Hear everything.
Control everything.

Uncompromising display from every angle.

With KURO, you can be sure that absolutely everything is processed in pristine quality. Starting with the transfer of digital audio and video signals, absolutely free of noise and compression, via a single HDMI cable. Continuing with a genuine High Definition display of 1,920 x 1,080p. And ending with you sitting back to enjoy movies in original cinema quality – that is, at exactly the 24 frames per second with which the films were shot and mastered. And that in itself makes KURO the perfect partner for HD sources such as Blu-ray.

Multimedia enters a new dimension.

KURO provides you with virtually limitless connection options for external sources with stored video and audio data – be it a digital camera, video camera or **USB** stick. Want to integrate KURO into your home network? That's not a problem either. The PDP-LX6090H and the PDP-LX5090H are **DLNA** (Digital Living Network Alliance) certified, which means you can use the **Home Media Gallery** to enjoy HD video content at up to 1,920 x 1,080p resolution. User-friendly operation is another KURO strength. The graphical user interface in these latest-generation units ensures even clearer separation between the individual menu items and the image content of the current channel.

In perfect sync.

Whichever way you look at it – from whatever angle, day or night – the image adjusts to you and your home with the utmost precision. The new **AV Optimum Mode** continuously optimises brightness, sharpness and colour settings. The system not only takes into account the lighting conditions in the room, but also the actual image on the screen. In addition, the audio is harmonised with the programme you are watching.
The result? Perfect sound and pictures at any given time.

Switch to greater convenience.

Outstanding flexibility with fewer cables.
The **High Definition AV converter** – PDA-V100HD – offers outstanding flexibility. It combines four HDMI inputs, one HDMI output along with one Component, Scart and AV-in connection respectively in a single device. By using an HDMI cable to the KURO, the converter provides an extremely tidy and visually appealing way to link all your home entertainment equipment. And thanks to KURO LINK, it gives you the added convenience of operating all compatible appliances using just one remote control.

Cinema with the system to match.
Complementing the KURO flat screen TVs, the LX01 is a Home Cinema System developed to satisfy the most discerning demands when it comes to design and technology. To find out more, turn to page 66-67.

Get all the facts:
www.pioneer.eu/kuro

The compatibility of the Pioneer KURO Flat Screen TVs with digital terrestrial or terrestrial /satellite TV broadcast services has been fixed at the time of their introduction. Details are described in the product specifications accessible on the relevant product pages on Pioneer's website or via the local Pioneer Service Contact.

Because you're
about to experience movies
like never before.

BLU-RAY DISC PLAYER

The film world has a new leading actor: Blu-ray.

Blu-ray discs are the ultimate HD format, completely redefining everything you ever knew about the world of digital entertainment. Blu-ray discs offer immense storage capacity of up to 50 GB. That's more than enough space to meet the demands of real High Definition entertainment with its huge range of options – including 1080p resolution at 24 frames per second playback.

Bring original cinema-quality pictures to your home.
The BDP-LX70A delivers the kind of exclusive performance you've only ever seen at the cinema. It offers video playback at the 'native' 1080p resolution, without tampering with the 24 frames per second cadence with which the films were shot, mastered and stored on disc.

The sound of High Definition.
It takes the right sound to convey the true intensity of a gripping movie scene. The BDP-LX70A outputs the new lossless audio **Dolby TrueHD** and **DTS-HD Master Audio** bitstream via HDMI to your compliant AV amplifier. Put simply, you can now enjoy high-resolution images accompanied by lush, studio-quality HD sound. True to the original and exactly as the sound engineer intended.

Multimedia comes alive.
The Blu-ray disc player lets you play digital videos, digital still photos and compressed music files stored in your home network. It is **DLNA certified** and provides you with easy access to digital media, for example from PCs, running a DLNA-compatible digital media server. Extremely easy operation is ensured by an intuitive on-screen Graphical User Interface and a user-friendly remote control. The **Home Media Gallery** even lets you play back HD video content with up to 1,920 x 1,080p resolution.

The fast lane to finer quality.
HDMI is a must-have interface for pristine quality. It enables the transfer of High Definition content with no loss of quality. In addition, the Blu-ray disc player features KURO LINK – allowing you to operate it with your KURO remote control.

No home network? Play PC files directly from DVD.
Not everyone has a home network (yet). So, these users can not readily enjoy the multimedia content from their PC files? Not with the BDP-LX70A: it supports a **Disc Navigator function** that enables playback of the same content formats as via its Home Media Gallery network feature, but this time from DVD disc.

The fast lane to the future.

Because
life's too short to miss
a thing.

HDD/DVD recorders

The possibilities are endless.

What's on today's programme? Simply everything.
The Home Media Gallery 3keys gives you rapid access to everything you've saved on the recorder. Just press the relevant button to experience whatever you want via your TV or music system – whether it's DivX films, photos or music. You can also use a PictBridge-compatible printer to print out JPEG photos directly from the hard disk or from a digital camera connected to the recorder.

More music please, but fast.
Those who want to play – as well as record – music from CDs in outstanding quality will appreciate the recorder's Digital Jukebox function. Music CDs can easily be copied at the push of a button and stored on the hard disk along with the relevant track information from the Gracenote® database. And at exceptional speed – 16 times faster than real time, to be precise. Want to turn a slide show into a stunning spectacle? Just use your favourite music to create a backing track for your JPEG images.

Whatever you want to experience, it's all here.
Store countless films on the hard disk, play all commercially available DVDs, rip CDs at high speed, create a slide show with background music, capture up to 24 hours on a single DL DVD-R, ... the list goes on. Suffice it to say that Pioneer HDD/DVD recorders are extremely powerful media centres.

Access all areas of your PC.
Copying DivX films, JPEG photos or music files from the PC to the recorder is child's play. All recorders come equipped with a USB connection, and the DVR-LX61(D) also features an Ethernet socket – which means you can simply click and drag the required files to the hard disk. It's that easy to bring everything you want to enjoy on your KURO together in one spot.

Reach new heights in clarity.
All HDD/DVD recorders feature an HDMI output terminal which ensures signal transfer without any loss of quality. They are also capable of upscaling video to **1080p** resolution.

You decide what's on when.
Genuinely convenient recording is all about putting you in control. The user-friendly **Electronic Programme Guide** lets you browse through the TV schedule, sort by programmes, time or category – at your leisure. It also lets you store personal favourites and decide what you want to watch or record next.

Put yourself in the picture.
With the integrated digital (DVB-T) tuner of DVR-560HX and DVR-LX61D, a host of terrestrial radio and TV programmes can be received and recorded in outstanding digital quality.

Master and Commander of time and space.

DVR-LX61D
Premium HDD/DVD Recorder with HDMI.
250 GB hard disk. KURO LINK. Built-in digital (DVB-T) tuner (with CI Slot) and analogue TV tuner. HDMI with 1080p upscaling.
Multi-format recording and playback. DivX playback.
Gracenote® Database. Electronic Programme Guide.
PC connect via Ethernet/USB. Home Media Gallery (3keys).
DV in.

No doubt about it.
The DVR-LX61D and the DVR-LX61 are members of the LX line. One look at the outside tells you all you need to know about the premium technology inside. As with all LX devices, they are a perfect match for KURO flat screen TVs.

The intelligent music library.
To archive all your albums and songs quickly and easily on the hard disk, the HDD/DVD recorders offer **Gracenote® database**, which automatically inserts the relevant track details from the database installed in the recorders. With the LX61(D), you can even retrieve the most updated information directly from the internet Gracenote® database.

Plug in your smart card.
If you use pay TV, you can plug your smart card directly into the **CI slot** on the front. An additional decoder box is no longer required.

One remote, full control.
The DVR-LX61D and the DVR-LX61 feature KURO LINK. This lets you operate the device to perform its main functions from the remote control of any KURO flat screen TV.

DVR-560HX
HDD/DVD Recorder with HDMI.
160 GB hard disk. KURO LINK. Built-in digital (DVB-T) tuner (with CI Slot) and analogue TV tuner. HDMI with 1080p upscaling.
Multi-format recording and playback. DivX playback.
Gracenote® Database. Electronic Programme Guide.
PC connect via USB. Home Media Gallery (3keys).
DV in.

Don't stop life, pause Live TV.
Pause Live TV offers you flexibility at the touch of a button. No need to panic if the phone rings while you're watching your favourite film on TV. Just pause the programme and record it in real time. You can stay on the phone as long as you like, and then just continue watching the film – from the exact same point at which you stopped it.

Because
true fascination goes beyond
the everyday.

DVD PLAYERS

All you need to make every performance unique.

The entire multimedia spectrum.
DivX, **DivX Ultra** or **Windows Media Videos**, **MP3**, **MPEG-4 AAC** or **Windows Media Audio** files – no matter what type of content you have, simply burn it onto a DVD-R/RW or CD-R/RW and enjoy it on your TV set. Listen to full-range digital music or display your JPEGs in high-resolution with the Photo Viewer.

Precise connections, full control.
The **HDMI** interface guarantees the complete digital transfer of high-resolution audio and video signals using just one cable. At the same time, HDMI ensures that the original signal is played back in original quality. The DV-LX50 features **KURO LINK**, so you can operate the key functions of the DVD player using the remote of your KURO flat screen TV.

Easy USB.
Got a USB memory stick packed with movies, music or JPEGs? The DV-610AV, DV-410V and DV-310 feature a dedicated **USB** interface right on the front. Simply plug in the memory stick for instant playback. But the DV-610AV can do even more: CD → USB recording. Simply select the CD tracks you want, choose the quality for conversion to MP3 format and the DVD player will record everything onto your USB stick.

Bigger, sharper, better.
Up to now, JPEG files could only be displayed at standard DVD resolution, irrespective of the actual file resolution. But the scaling capabilities of our HDMI models ensure that JPEGs can now be shown in outstanding high-resolution detail.

Ready for the 1080p experience.
Our HDMI DVD players are capable of upscaling video signals to a resolution of 1,920 x 1,080 lines and transmitting them via HDMI with no loss of quality.

Its greatest power: persuasion.

Perfect teamwork that shows.
From the very first glance, it's clear that in technology and design the DV-LX50 has found its ideal match in the LX line and KURO flat screen TV.

DV-LX50

AV RECEIVERS

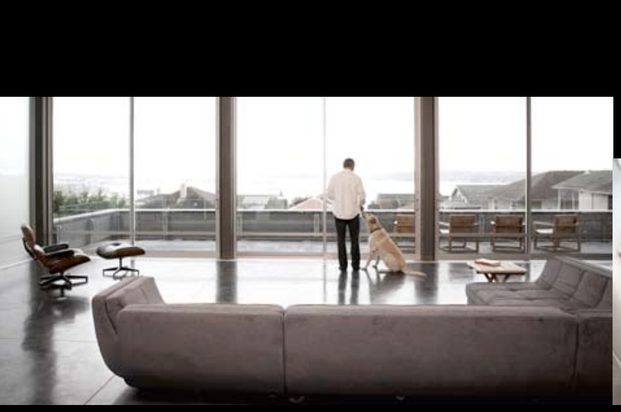
The best sound is one that learns your personal taste.

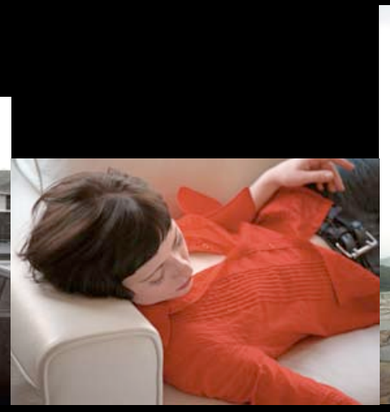
Experience the full meaning of precision, dynamics and attention to detail.
With a multi-channel AV receiver from Pioneer, you're equipped for every facet of audiovisual entertainment – from original cinema sound delivered in the finest HD quality to the outstanding playback of compressed music formats. And all perfectly in tune with your personal requirements.

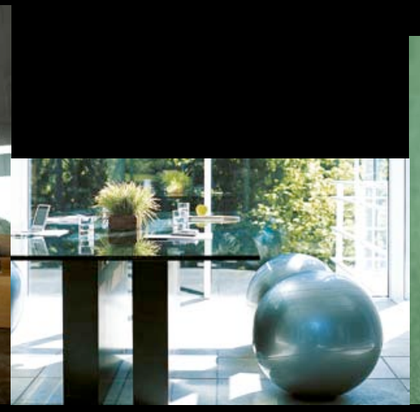
Ready for original cinema.
All the LX multi-channel AV receivers support the 'native' 1080p resolution, without tampering with the 24 frames per second cadence that is so essential to unlock the full potential of Blu-ray discs. The ability to handle 24p signals guarantees that every Blu-ray film is played back at the original speed of 24 frames per second with which the films were shot, mastered and stored on disc. In other words, you can now enjoy films in original cinema quality in the comfort of your own home.

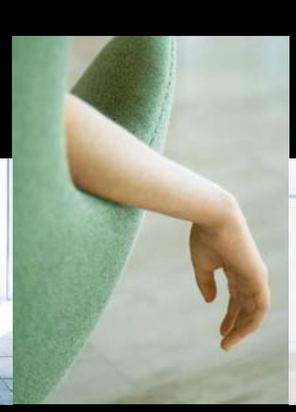
For balanced sound in a matter of seconds.
To make sure all the speakers in your system are in tune with each other and the room, our multi-channel AV receivers feature **MCACC** (Multi-Channel Acoustic Calibration System). Simply connect a microphone, press a button and the system will automatically and accurately analyse the sound characteristics of the room and calibrate accordingly. Along with parameters such as the number and size of the speakers, their distance from the listening position, channel level and frequency response, the effects of reverberation come into play. Potential standing waves are effectively minimised using **Standing Wave Control**.

The perfect partner for all HD media.
With their powerful, ultra-high quality video and audio sections combined with the latest interfaces, the LX multi-channel AV receivers are perfectly equipped to fully exploit all the audiovisual benefits of the latest HD media. The receivers' audio section uses an internal decoder that handles the new uncompressed, high-resolution audio formats **Dolby TrueHD** and **DTS HD Master Audio** with supreme ease – before transmitting them to your system's speakers with all the clarity and dynamics of the original signal intact.









One remote, full control.
The VSX-LX51 and the VSX-1018AH feature **KURO LINK**. This lets you control the main functions of the device from the remote control of any KURO flat screen TV.

Just go direct.
Most of our multi-channel AV receivers are equipped with a **front USB connection**, offering you an easy way to connect the vast majority of MP3 players and memory sticks. Sit back and enjoy your favourite songs in all their brilliance.

The elegant art of surround sound simulation.
Surround sound is normally created using the conventional 5.1 speaker layout. The **Front Stage Surround Advance** function lets you simulate an astonishingly natural surround sound environment using only two speakers. Without detracting from the quality of the original and without the visual clutter of cables around the room.

Take control of the phase.
Phase Control is the special Pioneer technology that automatically minimizes phase differences, especially in the low frequency range, and precisely calibrates the delay. Sound is faithful to the original source – more than ever before.

High Definition: the uncompromising audiovisual experience.

High-end – and it shows.
In sound and vision, our LX AV receiver makes a clear quality statement. With a design reflecting that of the elegant KURO flat screen TVs and the Blu-ray disc player, it is the perfect partner – both visually and technically.

VSX-LX51

VSX-LX51
1080p ready multi-channel AV Receiver.
7-ch 150 W. HDMI (3 in – 1 out).
Deep Colour. USB terminal. KURO LINK.
Dolby TrueHD, DTS-HD Master Audio.
HD Audio Decoding. iPod Digital.
Advanced MCACC with 9-band EQ.
Standing Wave Control. Front Stage Surround Advance.
Standard Phase Control. Advanced Sound Retriever.
Auto Level Control.

Ultra accurate colour reproduction.
The VSX-LX51 and VSX-1018AH support **Deep Colour**, which permits ultra-high colour depth of up to 36 bit. The result: smooth colour transitions, the finest colour gradation steps and a dramatically improved contrast ratio for a sumptuous viewing experience.

Get more out of every image.
1080p is the resolution that guarantees optimum image quality, the most realistic colour reproduction and crisp accuracy at all times. Most Pioneer multi-channel AV receivers are equipped to provide crystal-clear playback of 1080p signals – making them the perfect partners for HD sources, such as Blu-ray.

Enjoy your iPod to the full.

Most Pioneer multi-channel receivers are **iPod digital compatible**. This eliminates the need for a docking station, letting you connect your iPod directly to the receiver and control it using the receiver's remote. Needless to say, the digital and lossless transfer of your music is guaranteed.

VSX-1018AH

VSX-1018AH

1080p ready multi-channel AV Receiver.
7-ch 150 W. HDMI (2 in – 1 out).
Deep Colour. USB terminal. KURO LINK.
Dolby TrueHD, DTS-HD Master Audio.
HD Audio Decoding. Advanced MCACC with 9-band EQ.
Standing Wave Control. iPod Digital.
Front Stage Surround Advance. Standard Phase Control.
Advanced Sound Retriever. Auto Level Control.
Also available in silver.

VSX-918V

VSX-918V

Multi-channel AV Receiver.
5-ch 110 W. HDMI (2 in – 1 out).
USB terminal.
Auto MCACC with 5-band EQ.
iPod Digital. Standard Phase Control.
Front Stage Surround Advance.
Advanced Sound Retriever. Auto Level Control.
Also available in silver.

Rich sound in every format.
Thanks to the **Advanced Sound Retriever** function, compressed music formats such as MP3, Windows Media Audio or MPEG-4 AAC are enhanced to such a degree that the opulence and richness of the original are restored. So just hook up your portable audio player to the receiver and listen to music played back at near CD quality.

VSX-818V
Multi-channel AV Receiver.
5-ch 110 W. HDMI Switching (2 in – 1 out).
USB terminal. iPod Digital. Auto MCACC with 5-band EQ.
Standard Phase Control. Auto Level Control.
Front Stage Surround Advance. Advanced Sound Retriever.
Also available in silver.

Volume fluctuations eliminated.
Especially MP3 player recordings and commercial breaks in between programmes are a clear case in point: the volume level changes for no apparent reason. **Auto Level Control** eliminates these fluctuations to keep the dynamic of all content and sources at a constant level. So there's no longer any need to grab the remote to restore sound balance.

VSX-418
Multi-channel AV Receiver.
5-ch 110 W. Standard Phase Control.
Auto Level Control. Front Stage Surround Advance.
Front mini jack. Advanced Sound Retriever.
Also available in silver.

Because
there's no substitute
for clarity.

audio components

Stereo
in its purest form.

Nothing comes from purer sources.
Are you a devotee of clear, pure stereophonic sound in all its sublime subtlety? Then you'll find just what you're looking for in the diverse range of Pioneer Audio equipment. The sound produced by hand-picked, high-quality components has been elaborately checked and fine-tuned at London's AIR Studios. It's a process that not only unlocks the units' full potential but also earns them one of the world's most sought-after HiFi seals of approval.

PDX-Z9 proudly presents: the whole world in stereo.
Offering poised power delivery from a digital parallel amplifier, first-class Super Audio CD playback, the ability to receive terrestrial FM/AM radio stations as well as those from the World Wide Web – the PDX-Z9 Super Audio CD receiver embodies the entire spectrum of cutting-edge possibilities. Not only does it allow connection of your iPod and other USB devices, it's also DLNA certified and can therefore be integrated into your home network. But that's not all. It's equipped with an Advanced Sound Retriever function that can restore even compressed music formats to their original brilliance.

Fluent stereo played here: G-Clef.
From their unusual two-piece front design alone, it's clear that every G-Clef audio component takes a new angle on delivering unadulterated stereo music enjoyment. The aspirational amplifiers are backed by an inspirational design layout that uses ultra-short signal paths and dual mono symmetrical construction to guarantee the purest stereo sound. The Super Audio CD players bring the essence of music to life. The special integrated circuit technology Legato Link Conversion Pro takes the normal frequency response to new heights. The finest sound, based on premium-quality components, is also available from two audiophile tuners. Each tuner with its flawless, stable, absolutely noise-free reception of 100 programmable FM/AM stations is a feast for the ears. The F-F6-J additionally offers dynamic and extremely sensitive reproduction of 100 programmable DAB stations.

Committed to purity of spirit: Pure Malt Vintage Speakers.
The finest soft dome tweeters and powerful woofers composed of Paper fibre, all wrapped in speaker cabinets crafted from 100-year-old white oak whisky barrels – if they don't blend perfectly with the Pioneer audio components, nothing will.

One remote, full control.
All the amplifiers, Super Audio CD players and tuners in the G-Clef Series can be controlled from a single source – the optional available and elegant CU-R9 remote control. Its integrated learning function also lets you control other devices in your system.

Because
your senses are
overwhelmed.

home cinema systems

Right on the pulse.

All in one and all for you.
Pioneer Home Cinema Systems give you the incredible feeling of always being at the heart of the action, almost as if you're hearing and seeing everything live. Superbly matched system components – from the powerful speakers through the amplifier all the way to the playback unit – put your senses centre stage with room-filling 5.1-channel surround sound.

Interface for High Definition.
No loss in quality, no compromises – the **HDMI** interface is the fastest and most direct way of transmitting high-resolution video and audio signals. And thanks to the 1080p upscaling, video signals can be output at the highest possible resolution, whatever the source.

Home Cinema that takes its cue from you.
The **MCACC** (Multi-Channel Acoustic Calibration System) needs no invitation to analyse your room environment and calibrates your Home Cinema System all by itself. Curtain up on a system that's tailored to your living environment.

Listen to the original.
Now you can just hook up your portable audio player to the receiver and listen to CD-quality playback. Thanks to the **Sound Retriever** function, compressed music formats such as MP3 or Windows Media Audio are enhanced to such a degree that the opulence and richness of the original are restored.

Surround sound made easy.
You can now enter a whole new dimension in surround sound. The **Front Stage Surround Advance** feature simulates an extremely neat and natural surround sound set-up. And the beauty of it is that you no longer have to position the speakers around the room. Simply place them directly beside your TV set to free up space and eliminate the visual clutter of cables.

Being totally abuzz.

LX01
Premium 1080p HDD/DVD Recorder Home Cinema System. 250 GB hard disk.
Built-in digital (DVB-T) tuner and analogue TV tuner. Pause Live TV. Electronic Programme Guide.
USB terminal. HDMI (2 in – 1 out). KURO LINK. Dolby TrueHD, Dolby Digital Plus, DTS-HD Master Audio.
400 W Digital Power Amplifier. Front Stage Surround Advance. Advanced MCACC with 7-band EQ.

A feast for the ears.
The LX01 lets you enjoy every nuance and every note delivered in high definition studio quality in the comfort of your home cinema. It features an internal decoder capable of processing the new audio codecs **Dolby TrueHD** and **DTS-HD Master Audio** and transmitting them to your speakers with undiminished quality and dynamics.

A new era in three-dimensional sound.
The LX01 HDD/DVD Recorder Home Cinema System incorporates a speaker concept unique across the globe. The four satellite speakers are based on the dodecahedron principle, which allows them to create sound fields in all directions. The result is a three-dimensional soundscape that can fill every space and any living room without the need for a centre speaker.

The most intuitive way of putting you in control.
The sleek remote control that mirrors the exclusive design of the LX01 is extremely user friendly and features a large **LCD touch screen**. The LX01 supports **KURO LINK** so you can also control the system with the remote of your KURO.

Endless entertainment. With all the extras.
The **250 GB hard disk** in the HDD/DVD recorder can store a vast library of films, photos and digital music. **Multi-format playback** of all types of CDs and DVDs as well as content such as DivX films, MP3 and Windows Media Audio files adds to the sheer enjoyment this system has to offer. If you want to rip music CDs, **Gracenote®** automatically adds all title details.

RCS-LX60D
Premium 1080p 5.1-channel HDD/DVD Recorder
